Order (Task) Resource Changes

Delta of changes made to the standard FHIR DSTU2 Order resource for use as a Task for use within the GP Connect APIs. (Note: Consumer = Task Sender, Provider = Task Receiver)

Field	Baseline	Change	Description
identifier	0..*	0..1	Single local business identifier to be assigned by the Provider system
subject	0..1 Reference(Patient|Group|Device|Substance)	1..1 Reference(Patient)	All tasks are (currently) to be linked to a Patient resource - uses the 'gpconnect-patient-1' profile
source	0..1 Reference(Practitioner|Organization)	1..1 Reference(Practitioner|Organization)	All tasks are (currently) to be sent from a shared Organisation inbox (Practitioner has not been profiled out but is not supported yet) - uses the 'gpconnect-organization-1' or 'gpconnect-practitioner-1' profile
target	0..1 Reference(Organization|Device|Practitioner)	1..1 Reference(Organization)	All tasks are (currently) to be addressed to an Organisation-level inbox - uses the 'gpconnect-organization-1' profile
reason	0..1	1..1	Field has been modified to only allow the distinction between the

			two task types to be expressed
when	0..1	0..0	Not required. Tasks are not (currently) time bound
detail	1..*	1..1	All tasks must contain task details as a single free-text narrative - uses 'gpconnect-task-description-basic-1' profile
